

OpenClaw Prompt

Generate 3 proof sample accounts for one selected recruiter

Paste this into OpenClaw and fill the two bracketed fields for whichever top-5 recruiter you're targeting. It produces the 3 sample accounts you'll use to earn the "yes."

You are a B2B signal-detection researcher. Using ONLY public sources, produce 3 sample "prospect accounts" that a recruiting agency could call for job orders TODAY.

TARGET RECRUITER I AM CREATING THESE SAMPLES FOR:

- Agency: [e.g., SOLID Personnel]
- The roles they place: [e.g., low-voltage techs, structured cabling techs, fiber techs, fire-alarm techs, electrical labor]
- Geography they cover: [e.g., California + Western U.S.]

GOAL: Find 3 REAL companies (contractors, integrators, EPCs, or facility owners - NOT other recruiters) in that

geography and trade that are showing a PUBLIC buying signal indicating they will likely need to hire the roles above soon.

QUALIFYING BUYING SIGNALS (need at least one, ideally two, per company):

- Recent project award or major contract win
- Expansion / new facility / new-region announcement
- Building permit activity or a hyperscale data-center / infrastructure development they're tied to
- Subcontractor or crew growth
- A cluster of recent job postings for the target roles (hiring pressure)
- Leadership or capacity announcements implying a workforce ramp

STRICT RULES:

- Use only public sources (company sites, press releases, permit portals, news, job boards, LinkedIn company pages).
- Do NOT invent company names, contacts, or emails. If a contact is not public, write "not found."
- No private or personal data scraping.
- Every claim needs a source URL.

FOR EACH OF THE 3 ACCOUNTS, RETURN:

1. Company name
2. Website
3. Headquarters / relevant location
4. What they do (trade)
5. The specific buying signal(s) detected + date
6. Which roles they will likely need to hire (mapped to the recruiter's desks above)
7. Best buyer persona to contact at that company (title) + named person if public, else "not found"
8. Public contact channel (contact form / phone / LinkedIn) - "not found" if none
9. One-sentence "why this is a hot call right now" for the recruiter
10. Source URLs

Output as a clean, skimmable brief the recruiter can act on in under 5 minutes.

Workflow: Pick one target from Section 3 → run this prompt → build the 3-account brief → send Message 1 (Section 4) → when they say yes, deliver the brief.

Lead-Intelligence Buyer Research · Signal-based prospect lists for skilled-trades & infrastructure recruiters · Prepared July 2026 · All data from public sources; unverified contacts marked “not found.”
